

BANCI

FIRENZE

SHAPES
contemporary collection

During last 120 years Banci pursued the vision to change and influence people's hearts and spirit, creating lamps and luxurious interior design items which poured Beauty into everyday life.

Our creations always matched our artisans' meticulous pursuit of innovation in the lighting design field. We carved dreams out of precious materials and stones; through our offspring's we tamed and conveyed light as it hit the different surfaces and interacted with them in perfect harmony. We studied the shapes and forms that somehow repeat themselves in nature, geometry and architecture and that represent undisputed canons of pure Beauty.

Our production has recently drastically surged ahead, as our research and development team has finally had access to all the technological discoveries our world is going through, in this New Renaissance we are lucky and honoured to be living. New materials with amazing properties and characteristics have literally seen the light and we now have access to incredibly innovative techniques that just few years ago seemed absolutely unthinkable. Now, 120 years since our foundation, we feel that we are truly realizing our founder's dream: what we are doing now is something that transcends lighting design, it is its evolution. We call it "light engineering", whereas our artisans work alongside our engineers to take advantage of the new technologies and extreme precision techniques we delve deep into. We managed to reproduce a fully immersive sensorial experience through which the shapes and forms envelop the beholder.

A dream, started 120 years ago, that is expressed in this catalogue, which we hope you will read with the same enthusiasm and passion we daily pour into our activity.

INDEX

TWIST	pag. 08
CYLINDER	pag. 11
CIRCLE-M	pag. 16
SQUARE	pag. 20
CIRCLE 2	pag. 24
RING	pag. 28
