Giogali - Minigiogali

Restyling

Vi presentiamo le nuove iconiche collezioni Giogali e Minigiogali, disegnate nel 1967 dal Maestro Angelo Mangiarotti.

Silhouette più armoniose e arrotondate e composizioni più equilibrate.

La sorgente è stata posizionata centralmente e il numero delle lampadine è stato aumentato in molti modelli.

Questo ha permesso di migliorare notevolmente la diffusione della luce. La catena è stata sostituita da un cavo d'acciaio e da un rosone a lente, rinforzato in alcuni modelli. Fornito in finitura come la montatura. Tutti questi accorgimenti contribuiscono a donare un sapore nuovo a queste collezioni senza tempo.

We present the new iconic Giogali and Minigiogali collections, designed in 1967 by Angelo Mangiarotti Master.

More harmonious and rounded silhouettes and more balanced compositions.

The light source was positioned centrally and the number of bulbs was increased in many models. This has improved the diffusion of light significantly. The chain has been replaced by a steel cable and a lens canopy, reinforced in some models. Supplied in the same finish as the frame. All these changes contribute to giving a new look to these timeless collections.

Angelo Mangiarotti

designer

Angelo Mangiarotti è considerato uno dei grandi maestri del '900: architetto, designer e scultore, ha sempre affiancato all'attività professionale un'intensa e prolifica attività didattica e di ricerca.

Dopo una laurea conseguita al Politecnico di Milano e diversi anni negli USA, negli anni '50 rientra in Italia, a Milano, dove fonda il suo studio di architettura. Gli anni trascorsi all'estero e l'apertura mentale che lo contraddistinse lo rendono ancora oggi uno dei pochi architetti italiani ad aver goduto di grande fama internazionale, onore certificato da un grande numero di mostre, pubblicazioni e riconoscimenti che gli sono stati accordati prima e dopo la sua morte.

Tra i fondatori dell'ADI Associazione per il Disegno Industriale, Mangiarotti ha sempre considerato con grande attenzione le problematiche legate alla produzione industriale e della prefabbricazione. Questo interesse si riflette nella sua proficua attività di industrial design che trova uno dei suoi momenti più alti nella produzione della collezione Giogali per la storica vetreria veneta Vistosi.

Angelo Mangiarotti is considered one of the great masters of the 20th century: architect, designer and sculptor, he always combined his professional work with an intense and prolific activity of teaching and research.

After obtaining a degree from Milan Polytechnic and several years in the USA, he returned to Italy in the 1950s, to Milan, where he founded his architect's studio. The years he spent abroad and the open-mindedness that distinguished him place him, still today, among the few Italian architects to have enjoyed great international fame, an honour confirmed by the numerous exhibitions, publications and awards that were offered to him before and after his death.

A founding member of the ADI (Italian association for industrial design), Mangiarotti always gave careful consideration to issues related to industrial production and prefabrication. This interest was reflected in his successful industrial design work, which reached one of its highest moments in the production of the Giogali collection for the historic Venetian glassworks, Vistosi.

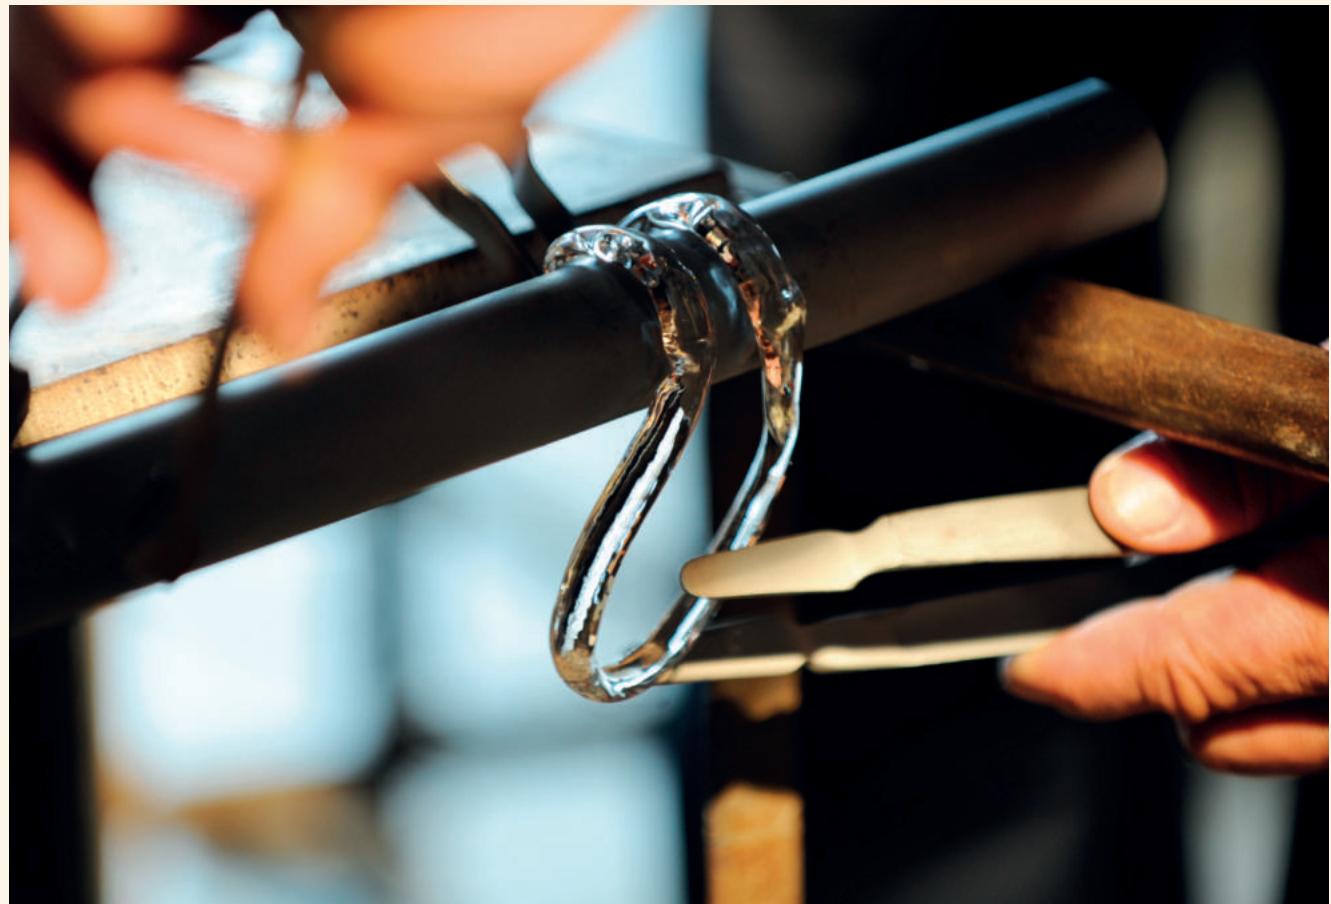

Materia e forma

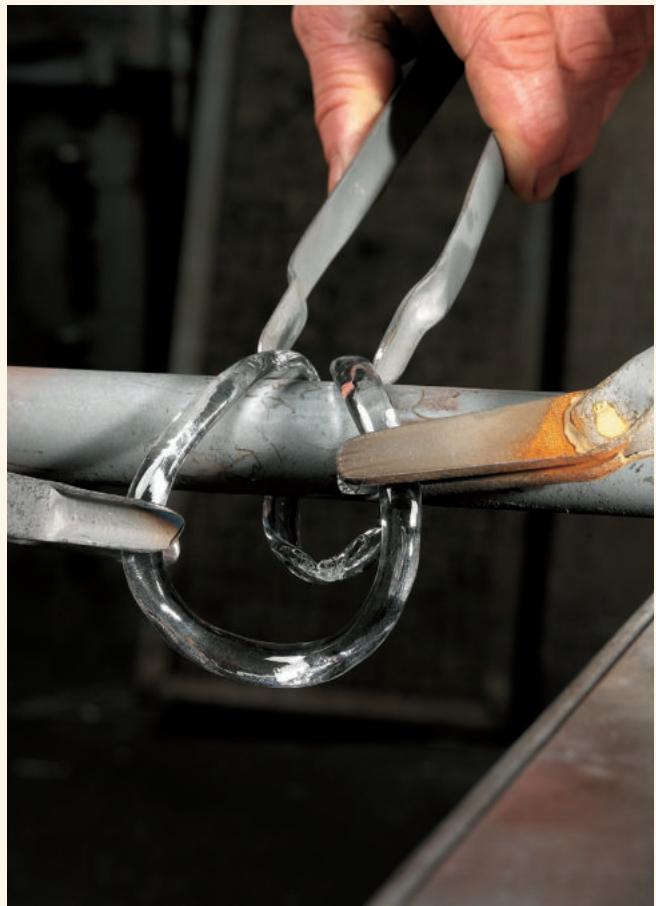

Material and shape

Il design è una buona idea. A volte, un'idea brillante. La creatività incontra il vetro plasmato da gesti sapienti e lo rigenera con la purezza delle linee: il vetro diventa diffusione di luce. Alchimie sempre nuove che esaltano malleabilità e trasparenza della materia convivono con la sperimentazione del design, nella filosofia Vistosi degli ultimi cinquant'anni. Dalla tensione continua a migliorare le tecniche e i materiali, cercando inattese armonie tra il vetro e le sue forme, nasce la bellezza senza tempo delle creazioni Vistosi.

Design is a good idea. A brilliant idea, sometimes. Creativity meets the skilfully shaped glass and regenerates it with pure lines: glass diffuses light. In the last fifty years the Vistosi philosophy combined experimental design with ever-growing alchemies which exalt the malleability and transparency of materials.

The timeless beauty of Vistosi's creations is due to an endless effort to improve techniques and materials with the aim of finding unexpected matches between glass and its shapes.

Finiture vetro Glass finishes

La luce della sorgente luminosa attraversa il cristallo extralucido frutto di una nuova formulazione priva di ossido di piombo che mette ancor più in risalto le forme della lampada. Le collezioni Giogali e Minigiogali sono disponibili in ben 10 finiture vetro. Fumè, ambra, bianco e nero con trattamento di verniciatura. Argento, oro, bronzo e i più recenti rame e nickel nero con un nuovo trattamento di metallizzazione resi ancora più resistente ai graffi e alla sfogliatura grazie a una speciale vernice protettiva ecologica. Tutte queste finiture sono disponibili anche per i prodotti su misura.

The light of the light source passes through the extragloss crystal, the result of a new formulation without lead oxide that highlights even more the shapes of the lamp.

The Giogali and Minigiogali collections are available in 10 glass finishes. Smoky, amber, white and black with paint treatment. Silver, gold, bronze and the more recent copper and black nickel with a new metallisation treatment made even more resistant to scratching and peeling thanks to a special ecological protective coat.

All these finishes are also available for custom products.
